
MptcpAnalyzer Documentation

Release 0.2

Matthieu Coudron

September 13, 2016

1	Indices and tables	3
----------	---------------------------	----------

This is the manual of mptcp analyzer, a python based linux tool to help plot some characteristics of an multipath TCP connection based on network traces (*.pcap files).

This document is written in `reStructuredText` for `Sphinx` and is maintained in the `doc/` directory of the package source code.

Contents:

Indices and tables

- `genindex`
- `modindex`
- `search`
